

# Agile Leadership

# Agile Leadership

## Intention

Companies face the challenge of adapting quickly and flexibly to changing conditions.

One measure to counter this change is the introduction of agile working methods such as Scrum, Kanban, etc.

In this leadership workshop you will learn the principles of agile work and the basics of Scrum and Kanban.

You deal with the understanding of the role of being a leader in an agile environment. In the exchange with other leaders, you will reflect on the opportunities and challenges of agile leadership.

**Target group:** leaders & executives

## Goal

- You know the values and principles of agile working and have an overview of Scrum and Kanban.
- With this background knowledge you will reflect on your current leadership behaviour and understand the specific requirements of leadership in an agile environment.
- You identify advantages, benefits, challenges and develop initial approaches to deal with them.

## Content

- Overview of the topic agility
- Understanding the role of a leader in an agile environment
- Agile Manifesto, Agile Principles and Values
- Insight into Scrum and Kanban
- Self-organisation
- Empowerment of employees
- Change in the context of leadership

**Duration & Format:** 2 days presence training or 2 modules à 3 hours Digital Camp

# Culture & Leadership

BRIAN TRACY

**Become the kind of leader that people would follow voluntarily - even if you had no title or position.**
